Oswald- addressbook

When HSCA raised the existing questions about thenomission of the Hosty data from the Gemberling report in 1978, there was an internal investigation. It included interviews with SAs and clerical personnel, typewriter and fingerprint examinations, and some conjectures. These are in the HSCA file, 62-117290 as Serial 1058X. Filing in 62-109060 as 7905 is lined through.

(In my view the original questions reamin without satisfactoty explanation.)

Hurt

Henry- I did not want to makke copies of this many pages for subject filing, so I made a carbon of the xref FYI
